

# PRONOVA

## INTERIOR

### **Environmental policy**

Pronova Interior AB is aware that our business affects society and the environment, locally but also globally. As a result of this, Pronova Interior AB shall be a company that promotes a better environment. We apply active environmental work where we constantly evaluate what we do based on its environmental impact. Pronova Interior AB shall think of long-term solutions and actively work to minimize the negative environmental impact on our surroundings. Pronova Interior AB shall know and live up to current requirements and regulations in environmental legislation, ordinances and local authorities.

In projects with our customers, we will provide knowledge and guidance on environmentally friendly products and environmental improvements. We will set higher standards and requirements for our suppliers and encourage them to do active environmental work.

We will therefore

- increase knowledge and raise awareness of environmental issues among all employees
- influence, demand and collaborate with other companies, suppliers, authorities and organizations
- see environmental improvement measures as investments
- prevent pollution in air, soil and water by considering the environmental impact of what we do
- constantly strive to improve the utilization of our resources within the company.
